CHEMICAL PLANT SECURITY ALERT SYSTEMS

Rice Electronics' is a system integrator with expertise in chemical plant security system design and installation. We represent many manufacturers and create custom security systems using such technologies as InfraRed night vision cameras and Pelco camera accessories. Fiber optic transmission systems, twisted pair, wireless (all spectrum), satellite, SCADA, spread spectrum, and microwave communication systems are all possible choices. We also provide unique, custom solutions designed for specific circumstances - such as fence monitoring sensors. We also install and configure security PC hardware and software.

Refinery and power plant security and safety have become primary concerns in today's political climate. Whether you're monitoring a stack flare, a processing unit, or remote areas, you need a security and surveillance system that will allow for a quick response when trouble appears.

Please call us to find out more about our full line of custom Plant Security Alert System technologies to see how Rice Electronics can best design and create the system that will serve your needs. Visit our website at www.riceelectronics.com, or email us for more information and a price quote at sales@radar-radio.com.

Pelco Cameras

Features Aluminum Construction, Adjustable Mounting Cradle Ideal for CCD Type Cameras - Available in 4-inch (10.16 cm), 6inch (15.24 cm) and 8-inch (20.32 cm) Diameters. For use in a Variety of Harsh and/or Hazardous Environments, including Marine Environments. Meets NEMA 4X and IP66 Standards. Use with Fixed Mount or Explosion-Proof Pan/Tilt

Infrared Night Vision

Thermal Infrared Night Vision Surveillance Camera systems are the ultimate night vision security products designed for ultra security surveillance in total darkness. Rice Electronic's expertise in infrared night vision technology provides complete night vision solutions with a full spectrum of infrared wavelength night vision power to answer the growing needs of increased security and homeland protection at a broad range of facilities including protection of infrastructure such as bridges, airports, seaports, subways, military facilities, refineries, power plants; perimeter security, as well as a variety of industrial and governmental facilities.

PC Security Software

Rice Electronics' expertise extends to designing and configuring PC-based security monitoring and control systems. Unlike general purpose control systems based on building management, CCTV or access control applications, the graphic user interface (GUI) and its companion network are optimized for perimeter and/or central security control room applications where speed, reliability, ease of use and integration are essential requirements. Open architec-

ture, industry standard TCP/IP interface and many hardware options provide a scalable and affordable security management solution without compromising performance or features.

System Integration

Rice Electronics offers a variety of proven products and services to enhance your business' productivity. We excel at designing custom solutions to your problems at the most economical prices available.

Our forte is integrating a whole host of diverse, state-of-the-art electronics technologies into one complete, easily-controlled system that improves and increases the productivity, safety, and security of your work environments, whether they be marine, oil, energy, construction, or manufacturing based.
